

## Sprint 3 Report

- Product Name: RentIt
- Team Name: Rental Web App

### Actions to stop doing:

- Committing to too many user stories for the Sprint
- Spending too much time on non-important tasks

### Actions to start doing:

- Checking the code base for agreed styling
- Start doing more code reviews
- Create unit tests

### Actions to keep doing:

- Showing up to meetings
- Discussing problems/roadblocks
- Discussing UI layout at the start of sprints
- Communication with one another on slack channel
- Updating work progress in respective branch
- Learning new libraries and tools
- Writing user stories in large font and sharpie
- Continue doing code reviews based on API for database tools

### Work Completed:

- As a renter, I want to be able to see what times have been reserved on the item so I know when I can rent it.
- As a user, I want to be able to search items so I can find what I need.
- As a user, I want to be able to edit my account information.
- As an owner, I want to be able to edit details of items I have posted.
- As a renter, I want to be able to rate the item on the basis of how it was maintained.
- As an owner, I want to be able to cancel a reservation so I can prevent users who have damaged items from renting my item.
- As a renter, I want to be able to cancel a reservation if I change my mind about wanting to rent an item.

### Work Not Completed:

- As an owner, I want to be able to see user ratings so that I can decide whether or not I should make transactions with that specific renter.
- As a user, I want to see the history of all my transactions.

- As a renter, I want to be able to browse popular items so I can see what people near me have to offer.

#### Work Completion Rate:

- Total number of user stories completed: 7
- Total number of estimated ideal work hours completed: 42
- Total number of days: 18
- Number of user stories per day: 0.4
- Number of ideal work hours per day: 2.3
