

Sprint 1 Report

- Product Name: RentIt
- Team Name: Rental Web App

Actions to stop doing:

- Writing user stories in small font
- Unnecessary importing of identical modules

Actions to start doing:

- Learning the database tools interface
 - Define API for database access
 - Separate and define backend vs. frontend tasks more clearly when planning sprints
- Record hours of completed task
- Start bringing snacks because our hunger distracts us
- Learn Javascript
- Follow new code style standards and definition of done requirements

Actions to keep doing:

- Showing up to meetings
- Discussing problems/roadblocks
- Discussing UI layout at the start of sprints
- Communication with one another on slack channel
- Updating work progress in respective branch
- Learning new libraries and tools

Work Completed:

- As a user, I want a secure and valid sign in or authentication method so that my private information is not shared with other people.
- As a user, I want to see a public home page without having an account.

Work Not Completed:

- As a user, I want to be able to view individual items on the website so that I can use the items posted. (near completion)
- As a user, I want to be able to post things on the website so that I can rent out my items. (near completion)
- As a user, I want to have a profile so other users can identify me. (near completion)

Work Completion Rate:

- Total number of user stories completed: 2
- Total number of estimated ideal work hours completed: 22
- Total number of days: 11
- Number of user stories per day: 0.2
- Number of ideal work hours per day: 2
